Religions help strengthen political, and cultural ties within societies?	As states and empires increased in size and contacts between regions multiplied, religious and cultural systems were transformed. Religions and belief systems provided a bond among the people and an ethical code to live by. These shared beliefs also influenced and reinforced political, economic and occupational <u>stratification</u> . Religious and political authority often merged as rulers, some considered divine, used religion, along with military and legal structures, to justify their rule and ensure its continuation. Religions and belief systems could also generate conflict, partly because beliefs and practices varied greatly within and among societies

Section 2.2 The Development of States	Answer Concepts & Relevant Factual Examples in <u>Underline</u>	"Fa
What were the characteristics of an "empire," and what were empires' characteristics during the Classical Era?	As the early states and empires grew in number, size and population, they frequently competed for resources and came into conflict with one another. In quest of land, wealth, and security, some empires expanded dramatically. In doing so, they built powerful military machines and administrative institutions that were capable of organizing human activities over long distances, and they created new groups of military and political elites to manage their affairs. As these empires expanded their boundaries, they also faced the need to develop policies and procedures to govern their relations with ethnically and culturally diverse populations: sometimes to integrate them within an imperial society and sometimes to exclude them. In some cases, these empires became
